

Maybe Just Bite Your Tongue

The animals gather together so that they can democratically determine what is to be served for dinner.

If the electorate consist of two wolves and a sheep, it is quite likely that the matter will go hard for the sheep, and it is difficult to imagine the sheep wanting to glorify the basic principle of democracy which says everyone has a say but the majority rules.

Multiply and diversify your electorate however you may wish, and the results will still, and always, leave some of the electorate quite concerned with the outcome.

Give that some thought when you feel inspired to wrap yourself in some flag or another on some issue or another, and maybe just bite your tongue, if only as a kindness to the sheep.
