

## *When We Dance*

*The band starts the music,  
It seems so familiar,  
I hold out my hand to you.*

*You step up to join me,  
Your arm on my shoulder,  
As to the rhythm we move.*

*The stars come together,  
The moon tips her halo,  
Everything else fades away.*

*My eyes see you only,  
Your smile holds me prisoner  
As to the music we sway*

*Our hearts beat together  
From now 'til forever  
I'll follow wherever you lead*

*My life's perfect moment's  
With you on the dance floor  
Naught else will I ever need*
